Advanced Tooling to Outperform Filters

Engineered with algorithmic precision to parse cleanly across core ATS architectures while preserving premium aesthetics.

ATS Matrix Core Engine

Real-time structural alignment analysis mapping raw text arrays against industry-standard parser logic models.

Recruiter Vision Simulator

Pre-rendered eye fixation simulators showcasing focal point zones to capture critical details in under 6 seconds.

Gemini Optimization Module

In-context AI models translating flat responsibilities into metrics-driven achievements using the STAR methodology.

FAANG-Approved Presets

Pixel-perfect CSS layouts completely decoupled from the data objects to ensure absolute zero spatial distortion.

Decentralized Local Ecosystem

Your data is fully portable and securely retained inside your client environment. Zero unauthorized analytical data mining.

Serverless PDF Compilation

Dual-pipeline client compilation backed by a headless serverless engine ensuring correct dimension rendering.

RECRUITER FIXATION MAP

Optimize for the 6-Second Glance

Technical screeners make decisions rapidly. The platform maps out textual alignment vectors to make certain that active impact parameters instantly engage human eyes.

- 1 Name & Structural Branding Focus**
Ensures optimal typography alignment for identity preservation.
- 2 Chronological Work Hierarchy Paths**
Bypasses layout shifting to stream screen attention downward sequentially.
- 3 Action-Verb Technical Terminus Mapping**
Accentuates active verbs directly within standard initial vision clusters.

ANALYZE YOUR LAYOUT MATCH

Recruiter Vision Simulator

Eye-fixation heatmap explainer illustrating the 6-second recruiter scan optimisation.

SUMMARY

Full Stack Software Engineer with 3+ years of experience designing and building scalable SaaS platforms, enterprise applications, and AI-powered solutions. Experienced across frontend, backend, system design, and cloud deployment with expertise in React, Next.js, Node.js, TypeScript, PostgreSQL, and modern AI workflows. Built production-grade CRM systems, workflow automation platforms, ATS resume builders, and multi-tenant SaaS products focused on scalability, performance, security, and exceptional user experience. Passionate about solving complex business problems through clean architecture, automation, and data-driven engineering.

KEY ACHIEVEMENTS

Built multiple production-grade SaaS platforms including a Multi-Tenant CRM, ATS Resume Builder, and 3D SaaS Portfolio Platform.

Designed and deployed full-stack applications focused on scalability, security, performance optimization, and exceptional user experience.

EXPERIENCE

TallyMarks Consulting (TMC) | Software Engineer | Lahore, Pakistan

11/2025 – Present

Engineered scalable enterprise applications using React, Next.js, TypeScript, and modern frontend architecture principles.

Architected AI-powered features and RAG-based workflows by integrating LLMs, vector databases, and enterprise data sources for high-accuracy retrieval.

Collaborated with cross-functional product teams to deliver production-ready solutions, optimizing for maximum performance, maintainability, and exceptional user experience.

Strategist Hub | Associate Software Engineer | Lahore, Pakistan

07/2025 – 11/2025

Built an AI desktop assistant for meditation and mindfulness using Electron, React, and Vite, enabling real-time voice and text interaction with an AI agent.

Integrated ElevenLabs voice AI, Twilio authentication, and a meditation content library with a custom Gemini AI, supporting secure login, chat,

SUMMARY (BIO)

649/400 chars

AI Write

Enterprise CRM Platform (Java) | *Technical Summary* | *Angular, React.js, Design, CQRS, Microservices, Stripe* | 04/2020 - 03/2023

- Architected a multi-tenant CRM platform featuring robust contact management, sales pipelines, workflow automation, RBAC and Stripe integrations.
- Designed scalable backend architecture with enterprise-grade security protocols, comprehensive audit logging, and automated reporting.
- Implemented high-concurrency WebSockets, subscription management, and custom workflows to drive modern SaaS business operations.

3D SaaS Portfolio | *Three.js, React, Express.js, SQLite, Tailwind CSS* | 11/2023 - 04/2024

- Built a SaaS portfolio platform with a CMS and admin panel, allowing users to manage and deploy dynamic portfolio content via routing.
- Developed a distributed full-stack architecture using React, Three.js, Express.js, and SQLite, supporting real-time interactive themes and scalable media uploads.

Resume Builder SaaS | *Next.js, TypeScript, Zustand, Tailwind CSS, AI/LLMs* | 10/2025 - 06/2024

- Developed an ATS-focused resume builder with resume parsing, AI-assisted optimization, ATS scoring, live preview, and PDF generation.
- Built using Next.js, TypeScript, Zustand, and Tailwind CSS to deliver ultra-fast, recruiter-friendly templates with real-time semantic validation.

EDUCATION

Punjab University College of Information Technology (PUCIT), Lahore

BS Software Engineering

10/2020 - 06/2024

Lahore, Pakistan

Coursework:

Software Engineering, Web Engineering, OOP, DSA, DBMS, Problem Solving, UI/UX Principles

CERTIFICATIONS

- Full Stack Web Development (MERN) Bootcamp | Udemy (2024)
- JavaScript Algorithms and Data Structures | freeCodeCamp (2023)
- Meta Front-End Developer Certificate | Coursera (2023)

I help startups, businesses, and founders build **scalable SaaS platforms**, AI-powered applications, enterprise software, and modern web products — shipped at production quality from day one.

With **3+ years** as a Full Stack Software Engineer, I specialise in React, Next.js, Angular, TypeScript, Node.js, NestJS, PostgreSQL, MongoDB, and modern cloud technologies.

CORE EXPERTISE

- ✓ Full Stack Development (React, Next.js, Node.js, NestJS)
- ✓ SaaS Product Development & Multi-Tenant Architecture
- ✓ AI Applications, LLM Integrations & RAG Systems
- ✓ Enterprise Software & Business Platforms
- ✓ REST APIs, WebSockets & Backend Engineering
- ✓ PostgreSQL, MongoDB, Prisma & Database Design
- ✓ Workflow Automation & Business Process Solutions
- ✓ Performance Optimisation & Scalable Architecture

RESUMEBuilder PRO FEATURE HIGHLIGHTS

- Dual-pane live editor with ATS score engine and real-time feedback
- Recruiter heatmap visualisation for 6-second scan optimisation
- Gemini AI bullet enhancement via STAR methodology
- Four FAANG-grade resume templates with instant switching
- Client-side PDF export with server-side Puppeteer fallback
- Multi-workspace support and local version snapshots
- PDF/DOCX/TXT upload and auto-population into the editor

Whether you need an MVP, SaaS platform, AI-powered product, CRM, internal business tool, or a complete full-stack application — I can help turn your idea into a secure, scalable, production-ready solution.
